

Hand pump

The TP-07 hand pump offers precise dispensing by pumping air into the drum or container and then pressing the lever for safe decanting.

Pump can also be used as a syphoning pump by keeping the lever in the 'on' position.

Features

- flexible operating options: tap open allows flow rates up to 20 L/m; safe and precise filling using tap lever
- available in three separate seals: EPDM (red) for alkaline media; FKM (green) for slightly aggressive media; NBR (blue) for non-flammable mineral oil products
- each pump includes three rubber adaptors ranging in size from 46.5-60 mm.

Specifications

Pump material	Polypropylene, 316 SS and PVC
Seal	EPDM (red), FKM (green) or NBR (blue)
Flow rate (max.)	20 L/min
Tube lengths (mm)	4 x 250
Suction tube diameter (max mm)	31
Temperature (max)	40 °C
Viscosity (max)	400 mPas
Container size	20 L-205 L (44 gallon)

Accessories

Transfer hoses available in NBR (blue), EPDM (red) and FKM (green).
